

# 90W POWER LINE COMMUNICATIONS SMART LED POWER DRIVER

LFL-90-0XX-P Digital Power Supply

### **Overview**

gridComm offers a state-of-the-art module consisting of a 90W LED power driver integrated with Power Line Communications (PLC) functionality (as shown above). It is ideal for Smart Street Light control, transforming traditional street lighting into energy-aware, remotely managed monitored networks. The core elements in the design are gridComm's proven robust OFDMA (Orthogonal Frequency Division Multiple Access) PLC GC8800 module (Figure 1), which is based on gridComm GC2200 PLC transceiver chip, and the patented digital power supply technology. This complete unit, known as LFL-90-0XX-P Digital Power Supply (DPS), is housed within a compact waterproof enclosure.

Other components from gridComm complement the LFL-90-0XX-P DPS are the Master Light Controller, and the backend Street Light Management Software (SLMS) that together form a complete Smart Street Light control and management system. The complete Smart Street Light system enables real-time control and automatic scheduling of switching on and off, and dimming levels of individual lights from a central location. This enables the delivery of appropriate lighting levels based on predetermined schedules according to the time of day, seasons, and weather conditions or in response to emergencies. Key accident black spots on roads can have their lighting tailored to ensure optimal lighting for maximum road user safety.

The LFL-90-0XX-P DPS also provides metering functions for real-time monitoring of operational status, power consumption, current, voltage, and power factor of individual street lights. This tremendously increases efficiency by reducing the need for manual checking of lights, and facilitates the timely repair of faulty lights.

Field proven for its acclaimed robustness and reliability, gridComm's PLC streetlight solution serves as the cornerstone in the building of a Smart City with a reduced carbon footprint.

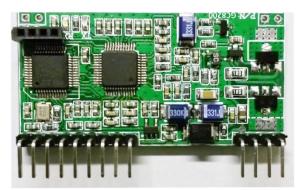

Figure 1 - PLC Module, GC8800

### **Benefits**

gridComm's streetlight solution comprising the SLMS, the Master Light Controller, and the intelligent LFL-90-0XX-P DPS delivers key benefits including:

- Less energy usage by using automatic lighting schedules, hence reducing the carbon footprint
- Savings in operating and maintenance costs
- Efficient remote monitoring system, thus doing away with using surveillance vehicles to check for faulty lights
- Flexibility in mixing different lamp types and technologies
- Scalability and extendibility to support other applications such as traffic, weather, and motion monitoring
- Display of street light locations on a map for real-time control and monitoring.

### **Features**

### Digital Power Supply LFL-90-0XX-P:

- Direct LED light driver
- Wide Input Power Voltage: 90 VAC~ 277 VAC

- Auto Power Factor Correction: >0.95
- Electronics Protection: Short-Circuit, Over-Voltage, Over-Current Over-Heating, Over-Loading, Electrostatic protection
- IP67 protection for outdoor and indoor
- Unique PHY\_ID address to correspond with GIS information of streetlight on GUI map
- Support real-time data read-back such as power consumption, current, voltage, light status
- Support sending of system alerts to central management system
- Highly reliable compliant with worldwide lighting standards- CE, CCC
- Five-year warranty
- Life span > 60,000 hrs
- PLC Rx Sensitivity: -60dBV
- PLC Tx Signal Voltage Level under 1 ohm load: 2~ 8V
- Transparent PLC protocol
- Self-adaptive link, auto-routing PLC network topology
- Operating temperature range- -30 to 60 degrees Celsius
- Lightning protection- 10KV surge

## **Specifications**

Part Number		LFL-90-024-P	LFL-90-030-P	LFL-90-036-P	LFL-90-042-P	LFL-90-048-P
Output	Rated Output Voltage	24Vdc	30Vdc	36Vdc	42Vdc	48Vdc
	Constant Current Voltage Range	16~24V	22~30V	24~36V	30~42V	36~48V
	Rated Output Current	4.16A	3.33A	2.78A	2.38A	2.08A
	Rated Output Power	90W	90W	90W	90W	90W

	Current 10% - 100% Regulation Range						
	Voltage Accuracy	±1%	±1%	±1%	±1%	±1%	
	Load Regulation	±1%	±1%	±1%	±1%	±1%	
Input	Voltage Range	90VAC~277VAC					
	Frequency Range	47Hz~63Hz					
	Power Factor (Typical)	PF>0.98/115V, PF>0.95/230V, PF>0.90/270V (full load)					
	Efficiency (Typical)	91%	91.5%	92%	92.5%	92.5%	
	AC (Typical)	1.1A/115VAC, 0.52A/230VAC, 0.43A/277VAC					
	Leakage Current	<0.7mA @ 277VAC					
Environment	Operating Temperature	-40°C~+60°C (refer to Derating Curve)					
	Operating Humidity	20%~95% RH (no condensation)					
	Storage Temperature Humidity	-40~+80°C , 10~95%RH (no condensation)					
	Anti-vibration	10~500Hz, 5G 12min/cycle, period for 72min. each along X, Y & Z axis					
()	Safety compliance	IEC61347, UL60950-1, TUV EN60950-1, IP67					
d EMC	Maximum Voltage	I/P-O/P:3.75KVAC, I/P-FG:2KVAC, O/P-FG:1.5KVAC					
Safety and EMC	Insulation Impedance	I/P-O/P, I/P-FG, O/P-FG:100MΩ/500Vdc/25°C/70%RH					
	Electro- magnetic Compatibility	Compliance to EN55015, EN55022 (CISPR22) Class B, EN61000-3-2 Class C (≧50% load); EN61000-3-3					
	MTBF	> 300Khrs					
Others	Dimensions	220mm*68mm*38.8mm(L*W*H), 20pcs/23.8kg/0.74CUFT					
	Weight	1150g					

## **Smart Functions**

Table 1 Descriptions of DPS Alarm Conditions

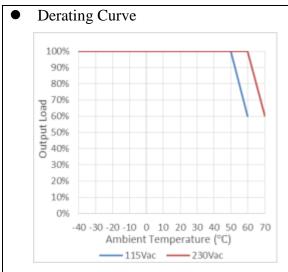

Alarm Type	Alarm Condition	Executing Action	Remarks
Over Temperature	> 95°C±2°C	Report alarm condition, shutdown device, restore to status before shutdown when temperature < 90°C±2°C.	Device internal temperature, not external temperature
Under Temperature	< -25°C±2°C	Report alarm condition, no shutdown of device, clear alarm condition when temperature > 25°C±2°C.	Device internal temperature, not external temperature
Short Circuit	Output short circuit	Report alarm condition, shutdown device, clear alarm condition during power on when output returns to normal condition	
Open Loop	Output voltage > specified output voltage	Report alarm condition, shutdown device, clear alarm condition when fault is removed.	
Over Voltage	> 285V±3V	Report alarm condition, shutdown device, restore to status before shutdown when input voltage < 280V±3V.	
Under Voltage	Under Voltage < 95V±3V Report alarm condition, shutdown device, restore to status before shutdown when inpuvoltage > 100V±3V.		

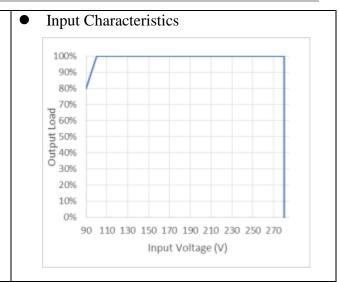

Table 2 Descriptions of Smart Features

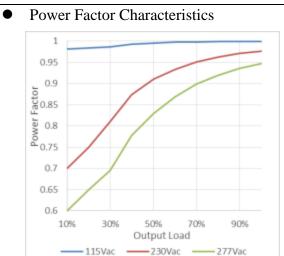

Feature	Feature Description
Dimming	By adjusting the output current of DPS through power line carrier signal, dimming level
	range is 10%~100%, with step-less dimming, dimming mode can be in single node
	dimming, group dimming or broadcast dimming.
Energy	DPS has built-in electrical measurement function, through power line carrier signal the
Measurement	electrical data is reported to concentrator, measurable electrical data includes: input
	voltage, input current, power, power factor, output voltage, output current and
	temperature, measurement accuracy can be up to 2%.
	Through power line carrier signal report real-time DPS operating condition, including:
Fault Reporting	temperature, short circuit, open loop, over voltage, under voltage, normal, dimming
,	status.

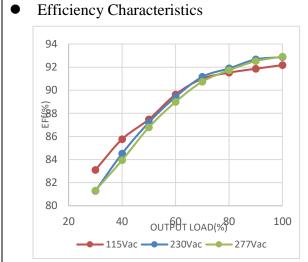

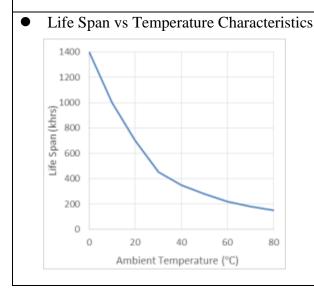

## **Characteristic Curves**

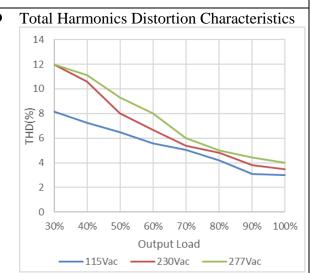

### **Mechanical Dimensions**

Overall dimensions of LFL-90-0XX-P shown in Figure 2, which are 220mm L x 68mm W x 38.8mm H.

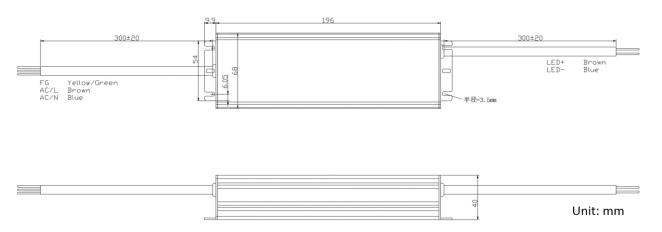

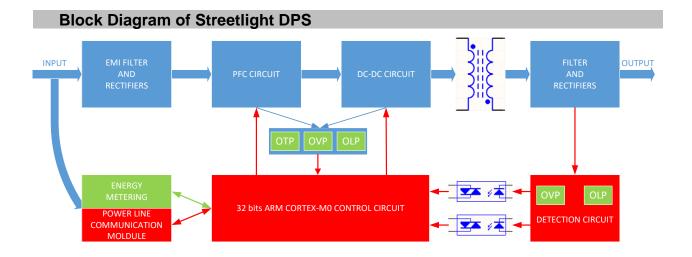

Figure 2 - LFL-90-0XX-P Dimensions and Wire identifications

### **Contact Information**
